Inainte de a incepe...

Masurati incheietura mainii pentru a vedea cat de lunga trebuie sa fie bratara.

Invatati sa impletiti.

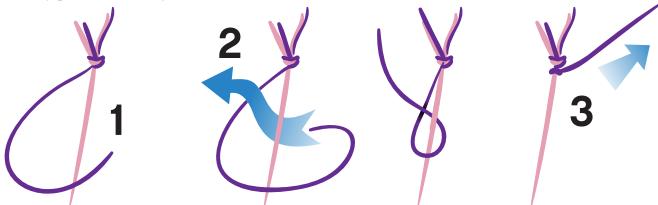

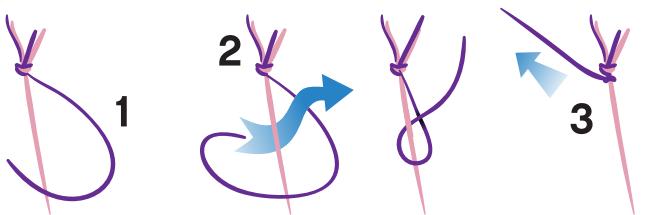

Veti avea nevoie sa folositi doua tipuri de noduri pentru a impleti aceste bratari:

NOD DE DREAPTA

NOD DE STANGA

Pregatirea firelor de bumbac:

Taiati firele de bumbac la lungimea corespunzatoare, apoi indoiti-le in jumatare si faceti un nod la aproximativ 10 cm.

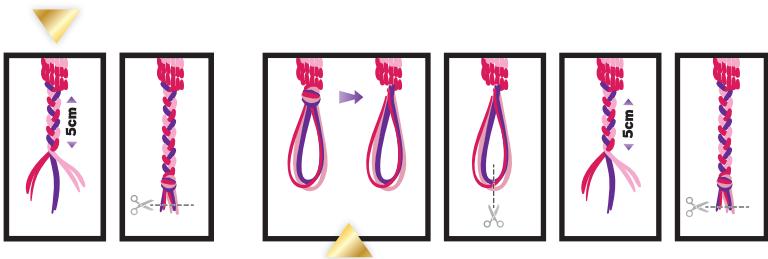

Pentru bratari realizate din 1-6 fire de bumbac folositi sistemul de prindere in forma de carlig.

Cum finalizam o bratara?

Dupa ce ati terminat de impletit, lasati firele de bumbac lungi de 5 cm, faceti un nod si apoi taiati firele ramase.

Apoi, dezlegati primul nod, taiati bucla si impletiti firele de bumbac. Faceti un nod si taiati firele ramase.
